

Phase One

Phase One of Letters and Sounds concentrates on developing children's speaking and listening skills and lays the foundations for the phonic work which starts in Phase 2. The emphasis during Phase 1 is to get children attuned to the sounds around them and ready to begin developing oral blending and segmenting skills.

Phase 1 is divided into seven aspects. Each aspect contains three strands: Tuning in to sounds (auditory discrimination), Listening and remembering sounds (auditory memory and sequencing) and Talking about sounds (developing vocabulary and language comprehension).

It is intended that each of the first six aspects should be dipped into, rather than going through them in any order, with a balance of activities. Aspect 7 will usually come later, when children have had plenty of opportunity to develop their sound discrimination skills.

Aspect 1 - General sound discrimination – environmental - The aim of this aspect is to raise children's awareness of the sounds around them and to develop their listening skills. Activities suggested in the guidance include going on a listening walk, drumming on different items outside and comparing the sounds, playing a sounds lotto game and making shakers.

Aspect 2 - General sound discrimination - instrumental sounds - This aspect aims to develop children's awareness of sounds made by various instruments and noise makers. Activities include comparing and matching sound makers, playing instruments alongside a story and making loud and quiet sounds.

Aspect 3 - General sound discrimination - body percussion - The aim of this aspect is to develop children's awareness of sounds and rhythms. Activities include singing songs and action rhymes, listening to music and developing a sounds vocabulary.

Aspect 4 - Rhythm and rhyme - This aspect aims to develop children's appreciation and experiences of rhythm and rhyme in speech. Activities include rhyming stories, rhyming bingo, clapping out the syllables in words and odd one out.

Aspect 5 – Alliteration - The focus is on initial sounds of words, with activities including I-Spy type games and matching objects which begin with the same sound.

Aspect 6 - Voice sounds - The aim is to distinguish between different vocal sounds and to begin oral blending and segmenting. Activities include Metal Mike, where children feed pictures of objects into a toy robot's mouth and the teacher sounds out the name of the object in a robot voice - /c/-/u/-/p/ cup, with the children joining in.

Aspect 7 - Oral blending and segmenting - In this aspect, the main aim is to develop oral blending and segmenting skills.

To practise oral blending, the teacher could say some sounds, such as /c/-/u/-/p/ and see whether the children can pick out a cup from a group of objects. For segmenting practise, the teacher could hold up an object such as a sock and ask the children which sounds they can hear in the word sock.

The activities introduced in Phase 1 are intended to continue throughout the following phases, as lots of practice is needed before children will become confident in their phonic knowledge and skills.

Phase Two

In Phase 2, letters and their sounds are introduced one at a time. A set of letters is taught each week, in the following sequence:

Set 1: s, a, t, p

Set 2: i, n, m, d

Set 3: g, o, c, k

Set 4: ck, e, u, r

Set 5: h, b, f, ff, l, ll, ss

As soon as each set of letters is introduced, children will be encouraged to use their knowledge of the letter sounds to blend and sound out words. For example, they will learn to blend the sounds s-a-t to make the word **sat**. They will also start learning to segment words. For example, they might be asked to find the letter sounds that make the word **tap** from a small selection of magnetic letters.

During Phase 2, the following tricky words (which can't yet be decoded) are introduced: I, no, go, to, the, into

Phase Three

By the time they reach Phase 3, children will already be able to blend and segment words containing the 19 letters taught in Phase 2.

Over the twelve weeks which Phase 3 is expected to last, twenty-five new graphemes are introduced (one at a time).

Set 6: j, v, w, x

Set 7: y, z, zz, qu

Consonant Digraphs: ch, sh, th, ng

Vowel digraphs: ai, ee, igh, oa, oo, ar, or, ur, ow, oi, ear, air, ure, er

During Phase 3, the following tricky words (which can't yet be decoded) are introduced: he, she, we, me, be, was, you, they, all, are, my, her.

Phase Four

When children start Phase Four of the Letters and Sounds phonics programme, they will know a grapheme for each of the 42 phonemes. They will be able to blend phonemes to read CVC (consonant-vowel-consonant) words and segment in order to spell them.

Children will also have begun reading straightforward two-syllable words and simple captions, as well as reading and spelling some tricky words.

In Phase 4, no new graphemes are introduced. The main aim of this phase is to consolidate the children's knowledge and to help them learn to read and spell words which have adjacent consonants, such as trap, string and milk.

During Phase 4, the following tricky words (which can't yet be decoded) are introduced: said, have, like, so, do, some, come, were, there, little, one, when, out, what.

Phase Five

Children entering Phase Five will already be able to read and spell words with adjacent consonants, such as trap, string and flask. They will also be able to read and spell some polysyllabic words.

In Phase Five, children will learn more graphemes and phonemes. For example, they already know ai as in rain, but now they will be introduced to ay as in day and a-e as in make.

Alternative pronunciations for graphemes will also be introduced, e.g. ea in tea, head and break.

With practice, speed at recognising and blending graphemes will improve. Word and spelling knowledge will be worked on extensively.

During Phase 5, the following tricky words (which can't yet be decoded) are introduced: oh, their, people, Mr, Mrs, looked, called, asked, could.

Phase Six

At the start of Phase Six of Letters and Sounds, children will have already learnt the most frequently occurring grapheme–phoneme correspondences (GPCs) in the English language. They will be able to read many familiar words automatically. When they come across unfamiliar words they will in many cases be able to decode them quickly and quietly using their well-developed sounding and blending skills. With more complex unfamiliar words they will often be able to decode them by sounding them out.

At this stage children should be able to spell words phonemically although not always correctly. In Phase Six the main aim is for children to become more fluent readers and more accurate spellers.
